

REPORT ON WORLD IMMUNIZATION DAY

Name of the event: World Immunization Day

Date: 10/11/2025

Time: 10 am – 11 am.

Venue: Chatrapati Shivaji Maharaj Hospital, Kalwa

The students of Shirmati Vimladevi Khyalilalji Vagarecha College of Nursing Education organized and performed an awareness programme on the occasion of World Immunization Day on 10th November 2025 on theme Immunization For All is Humanly Possible. The programme was conducted inside the campus of Chatrapati Shivaji Maharaj Hospital, Kalwa under the valuable guidance of Miss. Rupawali Bisht and Miss. Jasmine, both Associate Professors of our college. The main objective of this programme was to create awareness among the public about the importance of Immunization, the schedule of essential vaccines, and the prevention of vaccine-preventable diseases. The students actively participated in preparing Charts, posters, and also did role play explaining the meaning, purpose, and benefits of immunization.

Our batch took the initiative to design a short exhibition that covered various important aspects such as:

- What is immunization
- Types of vaccines
- National immunization Schedule
- Importance of timely vaccination
- Common misconceptions and myths
- Prevention of major communicable diseases

Through demonstration, explanation, and the use of AV Aids, the students clearly explained how vaccines help in preventing diseases like measles, tetanus, diphtheria, hepatitis, polio, and many more. The charts were displayed in a simple and systematic manner to make the information easy to understand for the general public.

At the same time, we emphasized Theme of the Day: **“IMMUNIZATION FOR ALL IS HUMANLY POSSIBLE”**.

SMT. VIMLADEVI KHYALILALJI VAGARECHA COLLEGE OF NURSING EDUCATION

Shaping the Future of Healthcare

The response from the audience was very positive and encouraging. Many people appreciated the efforts of the students and expressed that the information helped them understand the importance of timely vaccination for children, adult and the elderly. The interactive communication and dedication of the students made the programme impactful and meaningful.

In conclusion, the world immunization day Awareness Programme proved to be a successful and enriching experience for our batch. It not only helped the public gain valuable knowledge about immunization but also enhanced our skills in health education and public communication. Truly, one awareness programme can protect countless lives and strengthen the nation's health.
